

# PINBALL CABINET PROTECTOR KIT

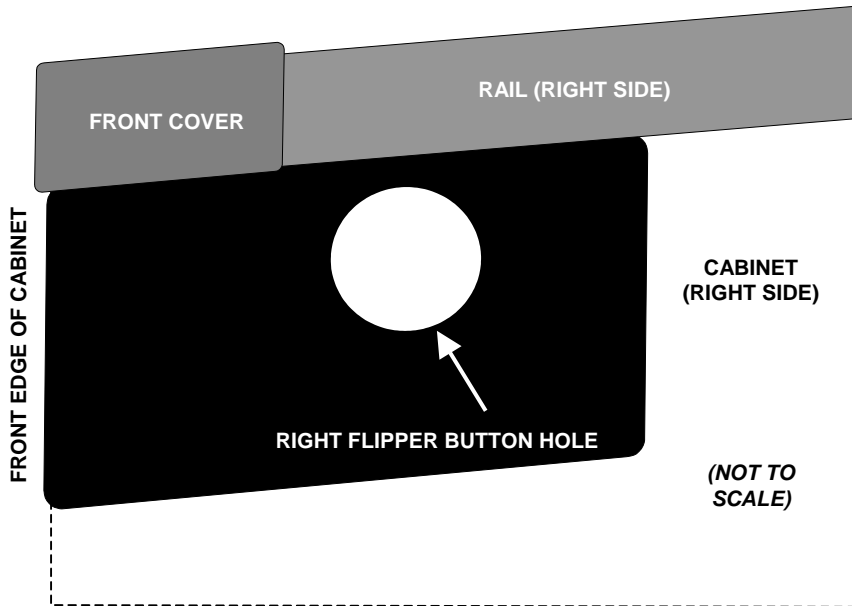

MayPrinting.com ©2005

- **Kits** - Available in *Black or White* Durable Self-Adhesive 3mil Vinyl, contains 4 Leg & 2 Button Protectors.
- **Leg Protectors** - A must for any new or old refurbished cabinet. Remove legs and stick to leg mounting area of the cabinet, directly to the back of the leg, or cut out and fold in half (leaving the backing on the vinyl) and insert between leg and cabinet like a gasket, fits most standard legs with 2-1/4" bolt spacing.
- **Flipper Protectors** - Can be applied without opening machine. Simply align over flipper button and rub on, fits most standard newer (1990 and up) type cabinets. Not required for older type cabinets, pinball manufactures reduced the rail size in the early 90's, thus leaving the cabinet exposed and prone to damage and wear around the flipper buttons.
